Item: 2020.TE15.1

Moved by: Councillor Josh Matlow

**That Toronto and East York Community Council recommends that:**

- 1. City Council request City Planning staff, in consultation with the Ward Councillor, to conduct a community consultation process to further review park design, the traffic impact study and the construction management plan prior to site plan approval.**
- 2. City Council request Engineering and Construction Services, in consultation with City Legal, to undertake a review of the 2001 Council-approved remediation and the status of implementation, including, but not limited to the recovery wells along the south side of St. Clair Ave between Bathurst St and Hilton Ave.**
- 3. City Council request Urban Forestry, Ravine & Natural Feature, to undertake an inspection of the Nordheimer ravine to determine whether there is indication of excessive deterioration of trees or atypical forest health concerns and whether there are related fire hazard concerns.**
